DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, 12-20 and 22, drawn to a method, device and system for communicating data between components, classified in class 385, subclass 88.
 - II. Claims 11 and 21, drawn to a method and system for communicating data between a server and at least one client, classified in class 709, subclass 203.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the inventions of Group I has a separate utility such as communicating data between a computer and computer display monitor. In the instant case, the invention of Group II has a separate utility such as communicating data between computers or between a server and a computer. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 2874

4. A telephone call was made to Andrew Abeyta on 8/7/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
